

Caltrans District 5 Active Transportation Plan

About:

The Caltrans District 5 Active Transportation Plan identifies bicycle and pedestrian needs across and parallel to the State Transportation System throughout California's Central Coast. Partnership with transportation stakeholders and the public will be critical to supporting a safe transportation network that encourages healthy communities. The six goals of the plan are the following:

Safety: Reduce the number, rate, and severity of bicycle involved collisions, working toward zero deaths.

Equity: Promote active transportation solutions that serve the communities within the District by improving accessibility and healthy transportation options for disadvantaged communities.

Partnerships: Strengthen partnerships with state, local, and regional partner agencies and community organizations to implement active transportation projects on the State Transportation System.

Mobility: Reduce dependency on single occupancy vehicle travel through mode shift to bicycling, walking, and transit.

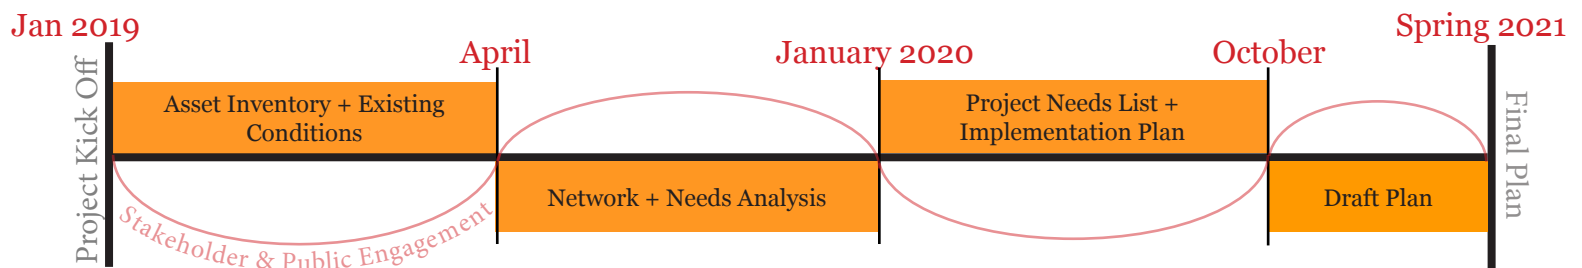

Maintenance: Ensure District active transportation strategies and actions adequately discuss the long-term maintenance needs and resources required to maintain a state of good repair for the State Transportation System.

Corridor Context: Identify needs unique to rural, main street, and trail corridors in the district.
